

staff-buy-back program

Employee sales of Departmental equipment creates goodwill and offers a significant benefit to employees however can become an onerous task on your ICT and administrative departments.

ACT Logistics manages the whole process allowing your staff (and their families) the opportunity to purchase not only their own Corporate equipment, but a full range of Ex-Government IT equipment at greatly reduced pricing.

QUALITY

Our Quality Assurance process ensures that after the Data Destruction, Technical Testing and Anonymity Process is completed staff receive equipment that is functional, cleaned, re-imaged with the appropriate licensing / software drivers, and packaged so employees receive systems that have a fresh look.

WARRANTY

All equipment comes with a comprehensive warranty and telephone support.

THE PROCESS

ACT Logistics manages and supports the whole process:

- We have a dedicated national account manager who looks after all staff purchases and will assist your employees in selecting the most appropriate product for their requirements.
- We have a retail outlet employees can visit Monday - Saturday (reduced pricing is available on all major items such as desktops, notebooks, screens and printers)
- Access to a complete range of ICT hardware and accessories (new and used)
- Third party software can also be purchased and loaded on the employees machine
- Invoicing the employee direct.
- Supplying a comprehensive warranty (there are a number of warranty upgrade options available).
- Full technical phone support

DEPARTMENTAL BENEFIT

This is a much more personalised and complete approach for your employees instead of them buying equipment via auction or e-bay.

Furthermore, there is no impact on any Departmental technical or administrative resources in allowing your employees access to purchasing their own Corporate or Ex-Government equipment.
