

FREE PC installations

The implementation of new equipment doesn't have to be complex, costly or time-consuming.

By consolidating the installation of new equipment with the End of Life (EOL) decommissioning services through a single source you can reduce your costs, increase profit, and gain operational efficiencies. Typically the value of the obsolete product covers or outweighs the cost of the services resulting in a "cost neutral" solution or in many cases where ACT Logistics PAYS the customer to perform these services!

What a great result for any organisation!

PROJECT MANAGEMENT

The differentiating factor with ACT Logistics is our process and understanding that each customer may have a unique set of requirements. Our process ensures needs are identified and programs are designed that meet specific customer requirements and KPI's.

Our services experts rely on results-driven best practices, strong industry experience, and proven methodologies that deliver measurable results.

FLEXIBILITY

To enable a smooth and the least-intrusive experience for the end user, many installations are performed out of hours or on weekends. We are flexible in our approach and strive to achieve the best outcome with the highest return each time. Our attention to productivity, process efficiencies and waste management ensures you maximise your investment and reduce IT services costs.

FURTHER INFORMATION

Our client list includes numerous blue chip companies, major corporations, local, state and federal government departments as well as large national and multi-national companies.
