

Networks

UNIQUE ADVANTAGE

Many of our customers understand the desktop environment however struggle with the complexities of disposal services associated with the server, data centre and telephony environments. ACT has a dedicated division, ACT Networks, specialising in the buy-back and associated disposal services for servers, storage systems, racks, cabling, switches, networking products, spare parts, and telephony products.

There is no product we won't take and we pride ourselves in being able to achieve the best outcome for customers with 'hard-to-dispose-of' products and brands including mainframes, SUN, EMC equipment etc.

CUSTOMER BENEFITS

As a result of this infrastructure and focus we can guarantee:

- The highest return on product
- Greatest understanding of the market
- Specialised valuation experts
- Dedicated technical specialists
- The best result to the customer

Furthermore, we still offer a superior solution (as with the desktop environment) by providing a guaranteed upfront "fixed" return on all products.

SERVICES AVAILABLE

We offer a full suite of services including national collection, FREE valuation, secure data destruction (3 or 7 wipe), data back-up, re-imaging and relocating of equipment, asset tracking, onsite audits, recycling and certified reporting.
